

Environmental Policy

Servotest Testing Systems Ltd design, test and manufacture Hydraulic test equipment from our manufacturing plant in Thorpe, Egham, Surrey, England.

Servotest Testing Systems Management are committed to protecting and continual improvement of the environment. To this end we strive to develop environmentally friendly designs, manufactured with the minimal environmental impact and operate a sustainable purchasing policy.

Through our EMS systems we follow the below framework for establishing and reviewing environmental achievement:

- Compliance with both applicable legal and voluntary requirements
- Provide a planned approach to Environmental improvement through the company's Environmental Management system and procedures
- Continually review, environmental effects of processes and developments, and plan accordingly
- Identifying by setting Objectives and Targets of affects and to drive improvement
- Ensure the necessary levels of documentation are maintained and audited by external Audit
- Our Policy and records are made available to all staff and members of the public
- Open communication makes environmental information available to all employees via notice boards and via the QEMS network. Customer and General Public information is available through the company website and/or by request
- The EMS system is reviewed by external Audit to ensure continuing stability
